

**Spare Parts
Service**

Sps, not just spare parts

Guaranteed long-term maximum performance from your equipment.

This is our goal. We aim to exceed your expectations not only with newly installed systems but also with older ones. Our specialist technicians and engineers can provide high-quality support and assistance all over the world, both on site and remotely on request.

We have now made our service even better with the launch of **Spare Parts Service**, a dedicated **online area where you can buy the recommended spare parts** for your machines.

The user-friendly catalogue will allow you to save time and money by buying spare parts that have been tested by the company, thus guaranteeing optimum performance and compatibility. Once you have made an order, our staff will take care of everything and the items will be conveniently delivered straight to your company premises.
